### Coronavirus Disease 2019 (COVID-19)

The Cal OES State Operations Center (SOC) activated 03/02/20 at 0700 hours in support of the California Department of Public Health (CDPH) Medical Health Coordination Center's (MHCC) statewide response to COVID-19. Cal OES will continue to provide resource coordination for the COVID-19 event, as well as situation status reporting and advance planning across multiple areas.

### **Situation Overview**

- **California State of Emergency Proclamation**

On 03/04/20, Governor Gavin Newsom declared a State of Emergency for California, as a result of the global COVID-19 outbreak that began in December 2019, to make additional resources available, formalize emergency actions already underway across multiple state agencies and departments, and help the state prepare for broader spread of COVID-19.

- **Global Health Advisory**

On 08/06/20, in close coordination with the U.S. Centers for Disease Control and Prevention (CDC), the Department of State lifted the Global Level 4 Health Advisory. The Global Advisory, initially put in place on 03/19/20, advised U.S. citizens to avoid all international travel due to the global impact of COVID-19. For more information visit: <https://www.state.gov/>.

- **State Executive Order N-33-20**

On 08/28/20, California introduced a blueprint for reducing COVID-19 in the state with revised criteria for loosening and tightening restrictions on activities by counties. Visit [Blueprint for a Safer Economy](#) for more information and to check the status of a county. This blueprint included a health equity metric to be used along with other metrics to determine a county's tier. The purpose of [Equity Metric](#) is to ensure California reopens its economy safely by reducing disease transmission in all communities.

- **CDPH Statewide Travel Advisory**

The California Department of Public Health (CDPH) has issued a new Travel Advisory superseding the 11/13/20 guidance. Californians should avoid non-essential travel to any part of California more than 120 miles from one's place of residence, or to other states or countries. Non-essential travelers from other states or countries are strongly discouraged from entering California, and if they do, should adhere to quarantine procedures. All persons arriving in or returning to California from other states or countries should self-quarantine for 10 days after arrival, except as necessary to meet urgent critical healthcare staffing needs or engage in emergency response.

# WEATHER KEY POINTS

01/27/21 - 02/02/21

## Wednesday-Tuesday

- A significant storm system will continue to impact much of central and northern California today through Friday, with precipitation gradually working south into southern California Thursday evening and Friday
  - The heaviest rainfall will occur across the Coastal Ranges near and south of the Bay Area, including the Santa Cruz Mountains and Diablo and Santa Lucia Ranges, where very heavy rainfall rates will likely produce some flash flooding as well as rock and mudslides near recent burn scars
  - Precipitation will shift south Thursday and Friday, with additional flood and debris flow impacts possible.
    - Burn scars of most concern are:
      - Meyers
      - Walbridge
      - Glass
      - Hennessey
      - Woodward
      - CZU
      - Carmel/River
      - Dolan
      - LNU
      - SCU
      - Creek
      - Apple
      - El Dorado
      - Avila
  - Very heavy snow will continue across the higher elevations of northern and central California, including the Mt. Shasta area and the entire Sierra.
    - Snow levels will start low across the northern valleys today but rise to 3,500 to 4,500 feet through this evening
    - Snowfall rates of 2-4 inches per hour will continue at times over the Sierra, with whiteout and blizzard conditions through today due to very strong winds. Total snowfall of 1-3 feet is expected in many higher elevations, with locally 5-7 feet or more over parts of the Sierra by Friday.
  - Strong winds of 40-60+ mph across the Sacramento Valley and Bay Area this morning will gradually subside today, but still remain quite gusty for the Sierra, southern Diablo Range, and Transverse Ranges through Thursday
- Additional precipitation could return to northern California for the weekend and into early next week, though at this time, amounts look much lighter than what is expected the next few days.
